Amendment to the Specification:

Please replace the paragraph on page 7, beginning on line 30 with the following amended paragraph:

C1 [[*]]Depending upon the product stored as well as relevant regulatory requirements, the fueling facility may also be equipped with a vapor collection monitoring device (69) that measures air-liquid ratios of recovered vapors in some systems configurations, flow performance for balance vapor recovery systems, and central vacuum unit monitoring. Such a system would also monitor pressure in the ullage space of the tank (19) by means of communications and power supply wires 81, 83, and 85 which service pressure monitors 13, 15, and 17 that have a sensor 21 that is mounted in the headspace of the tank 10.
